GitHub: Hemanth-205 **Location:** Puducherry

SUMMARY PROFILE

Final-year B.Tech Information Technology student with knowledge of Java, JavaScript, SQL, MongoDB, and web development using HTML, CSS, and React.js. Strong understanding of networking, Windows and Linux operating systems, and technical troubleshooting. Skilled in problem-solving and application development, with experience using Figma, Canva, Power BI, and UiPath Studio. Seeking an entry-level software engineering role to apply my technical skills and contribute to developing reliable software solutions.

EDUCATION

Manakula Vinayagar Institute of Technology, Puducherry **2023-2027**
Bachelor of Technology – Information Technology CGPA-8.5

Seventh Day Adventist Higher Secondary School, Puducherry
HSC (2023) : 73.33% | SSLC (2021) : Pass

SKILLS

- **Programming Languages:** Java
- **Databases:** SQL, Mongo DB
- **Networking:** CCNA-certified — network architecture, switching, routing, wireless essentials, network troubleshooting
- **Operating Systems:** Windows, Linux
- **Frontend Development:** HTML, CSS
- **Tools & Platforms:** Figma, Canva, Power BI, UiPath Studio

INTERNSHIP

Data Analyst - NEXTGEN SOLUTION June 2025 - July 2025

- Analyzed and troubleshot data-driven workflows, identifying issues and applying structured problem-solving to resolve data quality and reporting gaps.
- Built dashboards and reports using Power BI to communicate findings clearly to stakeholders.

Frontend Developer - MOTION CUT February 2025 - March 2025

- Developed and debugged responsive, user-facing web components, collaborating with the team to resolve issues and meet functional requirements.
- Gained practical experience with HTML, CSS, and JavaScript in a fast-paced, deadline-driven environment.

PROJECTS

AI-Powered Secure Digital Evidence Collection and Analysis System
Technologies: Java, Spring Boot, REST API, React.js, MongoDB
Developed a secure digital evidence management system that authenticates investigators and enables secure evidence submission. Implemented SHA-256 integrity verification, AI-based evidence analysis, incident timeline reconstruction, and automated forensic report generation.

Medical History Management Website
Technology: Java, HTML, CSS, JavaScript, MongoDB
MedHistory is a digital personal health record platform designed to manage and organize medical information efficiently. It provides users with an intuitive interface to store and access lab reports, prescriptions, and vital health records. The platform focuses on secure, accessible, and user-friendly management of personal healthcare data.

Smart Car Autonomous Speed Control System
Tech Stack: ESP32, Embedded C, IR Sensor, LiFi, LoRa SX1278, PWM, L298N Motor Driver, Blynk, Web Dashboard, Bluetooth, I2C LCD.
IoT-based Smart Car Autonomous Speed Control System using ESP32, IR sensors, LiFi, and LoRa to detect restricted zones, transmit speed limits, and automatically regulate vehicle speed through PWM-based motor control. Implemented real-time remote monitoring via LoRa, Bluetooth-based manual control, Blynk-based zone selection, LCD status display, emergency override, and a fail-safe mechanism for reliable autonomous speed regulation.

CERTIFICATIONS

- CCNA: Switching, Routing & Wireless Essentials — Cisco Networking Academy (Verified)
- Java Programming — Spoken Tutorial Project, IIT Bombay
- Automation Developer Associate Training (v2024.10) — ICT Academy Cohort 2
- Honors Diploma in Computer Programming — SARVA I.T & Educational Development

ACCOMPLISHMENTS

- Published a research paper titled "Big Data Privacy and Security in Data Analytics: A Review on Issues, Challenges, and Privacy-Preserving Methods" in IRJASH, Vol. 07, Issue 02, 2025 (DOI: 10.47392/IRJASH.2025.011).
- Achieved 1st Prize in National Technology Week Students Project Exhibition conducted by IQAC & R&D Cell, MVIT, Puducherry (2026).
